## Take a trip with AirFly

**AirFly** is a wireless adapter that lets you use your wireless headphones or earbuds in places that only have a headphone jack, like airplanes and treadmills. Plug this tiny transmitter into the headphone jack to listen to in-flight movies or TVs at the gym.

AirFly is compatible with all Bluetooth wireless headphones. If your headphones can connect to your mobile phone using Bluetooth, then AirFly can connect to your headphones too. All brands are welcome - **Sony, Bose, Beats and more!**
